PROFESSIONAL SUMMARY

Aspiring Machine Learning/AI Engineer and Python Developer with a strong, hands-on foundation in data analysis, SQL, and backend logic. Currently studying Artificial Intelligence at SQI College of ICT, with proven ability to clean raw data, extract insights, and build predictive machine learning models. Adept at building end-to-end applications and contributing to open-source projects, bringing a product-minded approach to fast-paced tech teams. Passionate about solving real-world problems with data while advancing toward full-scale AI development.

EDUCATION

SQI College Of ICT

Artificial Intelligence

Sept 2025 – Present

Expected Graduation Date: 2026-October

Build with Oyo (Mentorship Track)

Feb 2026 – Present

SKILLS

Technical Skills:

- ❖ Programming & Scripting: Python, SQL, HTML, CSS
- ❖ Machine Learning & Data Analysis: Scikit-learn, Pandas, NumPy, Matplotlib, K-Means Clustering
- ❖ Backend, Web & Scraping: Django, Selenium, BeautifulSoup, Scrapy
- ❖ Database: MySQL, SQLite
- ❖ Version Control & Collaboration: Git, GitHub, Open Source Contribution
 - **Other Tools & Skills:** Data Cleaning & Preprocessing, Web Scraping (Selenium, Scrapy), Jupyter Notebook, API Integration, Technical Documentation.

Professional & Interpersonal Skills:

- ❖ Problem Solving & Analytical Thinking: Ability to debug complex code and translate raw data into actionable business insights.
- ❖ Data Confidentiality & Compliance: Strict adherence to data privacy, secure reporting, and framework guidelines (highly experienced in compliance-driven environments).
- ❖ Project Management & Coordination: Capable of overseeing technical projects, tracking budgets, and

managing timelines from concept to deployment.

- ❖ Remote Collaboration & Technical Communication: Strong ability to document code, write technical reports, and collaborate asynchronously with global teams.
- ❖ Adaptability & Continuous Learning: Highly self-motivated to master new AI frameworks and backend technologies in fast-paced startup environment.

PROJECTS

AI Health Predictor (MediGuard) | Python, Django, Scikit-learn

- ❖ Built an end-to-end machine learning web application (<https://health-prediction-app.vercel.app/>) using a Django backend to predict heart disease risk and classify obesity.
- ❖ Applied advanced data cleaning and preprocessing techniques to prepare raw health datasets for accurate model training and prediction.

ValueSpec AI (Laptop Price Predictor) | Python, Django, Scikit-learn

- ❖ Developed and deployed a machine learning web application (valuespec-ai.onrender.com) that predicts the fair market value of laptops based on hardware specifications. Collected product information and converted it into a Pandas Data-Frame for analysis.
- ❖ Engineered a predictive regression algorithm to analyze market data, providing users with instant, data-driven pricing estimates to combat vendor markups.

E-Commerce RFM Customer Segmentation | Python, Pandas, Scikit-learn

- ❖ Analyzed a large e-commerce dataset by engineering RFM (Recency, Frequency, Monetary) features from raw transaction logs.
- ❖ Deployed an unsupervised K-Means clustering algorithm to categorize customers into actionable business tiers for targeted marketing strategies.

JAMB Computer-Based Test (CBT) Portal | Python, MySQL

- ❖ Engineered the core backend logic and Python script for a JAMB CBT preparation tool.
- ❖ Programmed the scoring algorithm to automatically calculate and return user results upon exam completion.

QuantBank Application | Python

- ❖ Programmed a secure banking simulation handling multi-user accounts, secure authentication, and complex transaction logic.

Open Source Contributor | Scrapy Repository

- ❖ Contributed directly to the official Scrapy open-source repository by optimizing technical documentation for web scraping workflows.

EXPERIENCE

Content Moderator & Fact-Checker | Meta (Contract) | Jan 2026 – Present

- ❖ Utilize the internal Single Review Tool (SRT) to strictly moderate content and verify data accuracy within a highly compliance-driven environment.
- ❖ Maintain exceptional attention to detail while following structured reporting workflows to ensure platform integrity and data validation.

Project Coordinator (Field Operations) | Feb 2026

- ❖ Managed the operational data, budget tracking, and timeline execution for a complex 75-meter geophysics and borehole drilling project.
- ❖ Reviewed technical reports and tracked resource allocation to ensure all casing requirements were met on schedule.
